

# RÚBEN ALVES

## FULLSTACK DEVELOPER

I'm a web developer capable of developing full stack projects. I learn and work with any framework or technology to build solutions, including the development of plugins, scripts and add-ins to automate processes.

## WORK EXPERIENCE

### FULLSTACK DEVELOPER FREELANCER

Bomsite - Soluções para internet, lda.

Jul 2022- Oct 2022 | Jul 2025 - Present

- Development services of CMS platforms for different end-clients
- Building eCommerce websites integrated to management software of end-clients.
- Training in C#, ASP.NET, and Artificial Intelligence.

### SOFTWARE ENGINEER

Link Consulting

Nov 2023 - Present

- Development of Angular project for managing files and workflows
- Implementation of the backend communications
- Construction of Office's addins with authentication and integration with the Angular' developed in Angular
- PR reviews and feature testing.

### FRONTEND DEVELOPER

rabbit mobile GmbH

Feb 2023 - Jul 2023

- Creation of a plugin for Figma that transpiles the Figma designs into Angular code
- Construction of a project in Angular with implementation of the backend communication
- Learning Figma and design systems

## SKILLS

- Web Design
- JS Frameworks
- Figma
- Git
- Problem Solving
- Team Player

## EDUCATION

### GESTOR DE REDES

Escola secundária de Benavente

2016 - 2020

### WEB AND MOBILE TECHNOLOGIES

Instituto Politécnico de Santarém

2021 - 2023

### COMPUTER SCIENCE

Instituto Politécnico de Santarém

2024 - Present

## LANGUAGES

Portuguese (Native)

English

## Work Certificate

**Mr. Rúben Alexandre Isaías Alves** completed a practical company internship in the area of front-end programming at rabbit mobile GmbH from February 22, 2023, to July 19, 2023. This took place at our branch in Lisbon, Portugal.

Our company specializes in the development of web and mobile applications as well as back-end solutions. We place great emphasis on providing high-quality services to our customers to meet their specific needs and requirements. Our clientele includes medium and large companies such as Epson, R+V, Ferrero, Roche, Beurer, and many others.

During his internship, Mr. Alves focused on developing a Figma plugin that converts interfaces created by the designer into HTML code. This allowed frontend developers to practically fully concentrate on the necessary logic, while the development of user interfaces was automated. The plugin was developed in TypeScript and also included a graphical user interface to improve user-friendliness. Mr. Alves proactively drove this project from the idea to its successful completion.

Mr. Alves demonstrated remarkable curiosity and creativity in solving programming problems during his internship. He has always shown himself to be cooperative and reliable, which has helped him to achieve excellent work results. In addition, Mr. Alves was always friendly, courteous, and professional in his dealings with his team and other employees of the company.

His performances have found our full satisfaction. We would have liked to hire Mr. Alves permanently after completing his studies, but to our great regret, this was not possible due to operational reasons. Nevertheless, we would like to express our explicit recommendation for him, as we believe that his abilities and team spirit would be an enrichment for any team.

We thank Mr. Alves for his excellent work and wish him all the best and much success for his further professional and personal path.

Frankfurt am Main, July 19, 2023

## Carta de Referência

**O Sr. Rúben Alexandre Isaías Alves** realizou um estágio profissional em programação de front-end na rabbit mobile GmbH, de 22.02.2023 a 19.07.2023 na filial de Lisboa, Portugal.

A nossa empresa é especializada no desenvolvimento de aplicações web e mobile, bem como soluções de back-end. Damos grande valor à prestação de serviços de alta qualidade, com o intuito de corresponder às necessidades e requisitos específicos dos nossos clientes. Os nossos clientes são geralmente empresas de grande e média dimensão, tais como a Epson, R+V, Ferrero, Roche, Beurer, entre outras.

Durante o estágio, o Sr. Alves focou-se no desenvolvimento de um plugin para Figma que converte as interfaces criadas pelo designer em código HTML. Isto permite que os developers se concentrem principalmente nas regras de negócio e validações, uma vez que o desenvolvimento das interfaces foi deste modo automatizado. O plugin foi desenvolvido em TypeScript, onde inclui uma interface gráfica para facilitar a visualização. O Sr. Alves promoveu proativamente este projeto desde a ideia até à sua implementação final.

O Sr. Alves demonstrou uma curiosidade e criatividade notáveis na resolução de problemas de programação durante o seu estágio. Ele mostrou-se sempre cooperativo e confiável, o que o ajudou a alcançar os excelentes resultados obtidos. Adicionalmente, o Sr. Alves foi sempre amável, cordial e profissional com a sua equipa e outros funcionários da empresa.

O seu desempenho correspondeu à nossa total satisfação e, como tal, o nosso objetivo seria contratar o Sr. Alves permanentemente após o término do estágio (bem como dos seus estudos). Infelizmente e devido a razões operacionais não nos foi possível. Neste sentido, gostaríamos de expressar a nossa profunda recomendação, uma vez que acreditamos que as suas capacidades e espírito de equipa serão uma grande aquisição para qualquer equipa.

Agradecemos ao Sr. Alves pelo seu excelente trabalho e desejamos-lhe todo o sucesso no futuro, tanto profissional como pessoal.
